7. Other activities

7.1 Virtual Internships Platform

The idea behind this platform is to respond to the pandemic situation or any future crises. It also helps resolving the accelerated demands on internships from the academic institutions and the resource limitations in industry.

The VIP as we imagine will offer a linkage portal for the partner enterprises and students to exchange the internships and employment opportunities on one side and market the skilled candidates on the other.

Based on the contacts and discussions made with the enterprises, given their business and experience, this platform is suggested to be build.

We already have a basic technical proposal from one of these enterprise which came out after a set of meetings. Currently, we are working on the finical offer and the formal proposal before sending it to ELEGANT for approval.

7.2 External Advisory Board for Computer Science Department

A set of contacted IT enterprises were nominated to be as a member in the advisory board for the computer science department in addition to the liaison officer of ELEGANT. One of the most important objectives of this board is to enhance the department curriculum from the industry point of view, which exactly meet the ELEGANT goal. The first meeting took place on 29-4-2021.

7.3 Creating a Facebook group ([JUST To Job | Facebook](#))

This is a public group created on 6-9-2020, to facilitate contact with the students. It contains, so far, 700+ members ranging between pre-graduate, post-graduate, alumni students, faculty members, and people from the industry to share posts about recent internships programs or job vacancies, and to announce any related seminars or workshops.
